Crown Care Mission Statement

Our mission at Crown Care is to foster the intellectual, creative, social, emotional, and physical growth and development of our students and to inspire a lifelong commitment to learning. A caring, educational environment promotes cultural values and supports positive relationships and respectful interaction. We encourage children to learn by doing - moving from concrete, hands-on experiences to more abstract concept development. Our priority is to provide a healthy balance of child- directed and teacher-guided activities, as well as time for children to work individually, in small groups and in large groups. Our program provides an integrated, comprehensive approach to learning for the children in our community.

- Staff will be accepting and understanding age-appropriate behavior (crying, messiness, resistance and/or assertiveness).
- Crown Care's environment is designed to encourage self-discipline, thus eliminating potential problems (shelves will be labeled with descriptions and or pictures of toys to encourage children to put toys and items where they belong).
- Staff will present themselves as a positive role model by using appropriate language in an appropriate tone, as well as, behavior and proper use of materials (children imitate what they see and hear).
- Staff will acknowledge children for appropriate behaviors, thus sending a clear message that correct

behaviors are worthy of praise (this helps the child distinguish between right and wrong).
